

## **Research Plan**

**6 pages at the most, including references (applications exceeding 6 pages will not be evaluated).**

Use Times New Roman 12 pt font, line spacing 1. Be especially sure that part IV, "Research execution and timetable", is sufficiently specific.

Make sure that your application states the intended use of the grant clearly.

If you are writing your thesis, please state clearly in your research plan what stage your thesis work is at.

**Use the following divisions:**

I Background

II Goals

III Hypothesis

IV Research execution and timetable

- If you like, preliminary results may be presented here. Preliminary results presented on separate attachments will not be evaluated. The preliminary results are not a necessity for the success of your research, as innovativeness and a high scientific level are by themselves sufficient.
- test subjects
- procedures
- power analysis (reasons, if the power analysis has not been carried out)
- ethical aspects
- timetable
- budget proposal, as well as a short description of the total financing plan

V Short description of the significance of the research, and also how it will benefit diabetes care and research

VI References
